Xls, XlsX,
PPT, PPTx formats**

**Internet Suite with
Chrome Browser,
Email-client,
Messenger,
among others**

**Graphics &
Multimedia Tools**

(Self Support)

FEATURES

- **Maximize user-efficiency**
- **Reduce costs**
- **Virus-free Secure-Friendly Environment**
- **Comprehensive set of Productivity tools**

• **Word processing, Spreadsheet, Presentation**, and other office productivity tools through Libre-Office (a comprehensive, ISO standard-compliant office productivity suite with support for Open-Document format, Microsoft Office import functions), and these applications are interoperable with their Microsoft counterparts.
This means users can create, view, and edit Microsoft-formatted documents or email messages, that they already may have as their existing data.

• **Internet Suite** (Google-Chrome & Mozila) Browsers, Thunderbird Email-client (Email, Calendaring, Contact management), Team-viewer, connecting to Google-Calendar, Face-book, Hangout, Skype, etc.

• **Graphics** (2D & 3D) & **Multimedia** Tools (Audio & Video Player & Editor).

• **Network & System Management Utilities** & a lot more, upgrade-able free to more than 50,000 applications including **Games** & **Development tools** & **Environments**.

• **Gain productivity** with enhanced built-in search capabilities, side-by-side window layouts, and interactive notifications.

• **Customize your Desktop** in way you could never do so far, as required to meet the needs of the each user. Your Desktop can be customized to minimize the installation footprint by removing unneeded applications, secured to prevent unauthorized access, or granularity configured—at the application, network, and user interface settings level—to meet the specific needs of each user.
